

Pump

Reliable, high-capacity pumps for transferring meat, fish or poultry material, even if it contains limited liquid and large particles. The Lamella Pumps can be delivered with pump housings in cast iron or stainless steel in all sizes to suit individual requirements. The pumps are manufactured with replaceable wear parts in highly wear resistant steel. The pumps have only one (or three) moving part and can be equipped with a mechanical sealed bearing or a standard bearing arrangement with stuffing box.

Features

- 1, Only one moving part
- 2, Simple sealing system
- 3, Temperature resistant
- 4, Replaceable wear parts

Application

- 1, Fish processing
- 2, Wet and dry rendering
- 3, Pet food production
- 4, Poultry offal (except feathers)
- 5, Rendering (raw material etc.)
- 6, By-product transfer in meat processing plants
